Our passion for riding and our dedication to engineering excellence mean that Ashima has built a design philosophy that we live daily. Freedom at Ashima means the freedom to innovate, create and push the boundaries in bicycle braking technology. Over 300 world wide Patents in 14 years show our clear commitment to bringing the most up to date solutions to riders the world over. Whether the stimulus is the OEM/ODM aftermarket or a brand seeking a new product line, Ashima's approach and R+D capabilities deliver products imbued with a fresh outlook backed by proven technical expertise.

CONTENTS

INTRODUCTION ————— **P.01**

BRAKING PRODUCTS

DISC ROTORS ————— **P.03 ~09**

- Standard Rotors
- AiROTOR
- Ai2
- AiNEON
- AEGiS
- New Disc
- Flo-tor
- Centerlock Adaptors
- Boost Hub Adaptors
- Disc Brake Caliper Adaptors
- Centerlock Rotors
- Rotor Bolts

DISC BRAKE PADS ————— **P.10~18**

- Compound Selection
- Multi-Compound Disc Brake Pads
- Standard Disc Brake Pads

BRAKE SHOES ————— **P.19~27**

- Compound Selection
- Brake cartridge Selection
- Pad Style
- 4 Function In 1 Brake Pads
- Shimano Direct Mount
- Standard Range 35, 36, 45, 46, 47, 48, 50
- Advanced Range 65, 66, 68
- Pro Range 72, 73, 75, 76

HOSE & CABLE ————— **P.28~40**

- Hydraulic Hose
- Hose : Kit Box
- Inner Wire : Header Card
- Inner Wire : Work-Shop Box
- Outer Casing : Work-Shop Box
- Outer Casing : Zip Bag
- Outer Casing : Kit Box
- Accessories

RITE TOOLZ ————— **P.41~46**

- Hydraulic End Fittings
- Bleeding Accessories
- Bleeding Kit
- Cycle Computer Mount

DISC ROTOR STANDARD ROTORS

Our Standard Rotors are all made of High Grade stainless steel SUS410, and designed to provide consistent braking whilst dissipating dirt. Single-Piece Construction Standard Rotors available in a range of sizes to suit most kind of riding style.

ARO-01

- High Grade stainless steel SUS410
- Single-Piece Construction
- High Efficacy at dissipating Heat and Dirt
- Beyond ISO Standard

Options / ARO-01

Part No.	Weight
ARO-01-160	140g
ARO-01-180	173g
ARO-01-203	200g

AiROTOR AiE

ASHIMA technology taken to the limit! Single-Piece Construction with Extreme Low Mass, AiRotor, heat-up more than heavier rotors which may adversely impact some low spec systems during prolonged braking events. However, conversely due to the extreme low mass they also cool fast, so with proper / normal braking consideration the heating / cooling effect can be balanced.

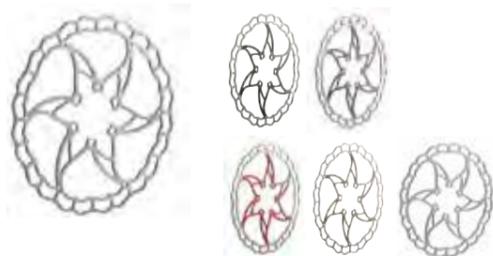

ARO-08

- High Grade stainless steel SUS410
- Single-Piece Construction with Extreme Lightweight design
- High Efficacy at dissipating Heat and Dirt
- Beyond ISO Standard
- Ground and Hardened to 42 HRC

Options / ARO-08

Part No.	Weight
ARO-08-140-XX	68g
ARO-08-160-XX	85g
ARO-08-180-XX	112g
ARO-08-185-XX	113g
ARO-08-203-XX	136g

XX=Color Option **Plain** **BK** **RD** **GD** **BU** **WH**

ARO-09

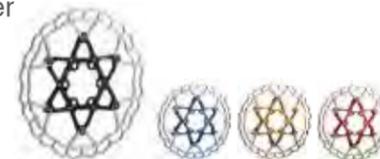

Options / ARO-09

Part No.	Weight
ARO-09-140-XX	64g
ARO-09-160-XX	73g
ARO-09-180-XX	104g

XX=Color Option **Plain** **BK** **RD** **GD** **BU** **WH**

AiNEON

ASHIMA technology taken to the limit! AiNEON TWO-Piece Construction Rotors, Alloy Carriers are made of Aerospace materials and combined with High Grade Stainless Steel Braking Band. Exceptional Heat Dissipation from the braking annulus, due to the high thermal conduction of the Alloy Carrier

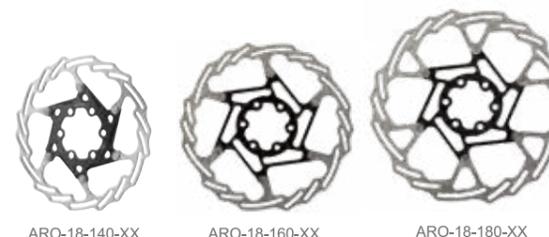

ARO-10

- Alloy Carrier: Aerospace 7075-T6 Heat treated
- Braking Band: High Grade stainless steel SUS410, Ground and Hardened to 42 HRC
- Two-Piece Construction with Extreme Lightweight design
- High Efficacy at dissipating Heat and Dirt
- With 6 pcs of 7075 Alloy Bolts
- Beyond ISO Standard

Options / ARO-10

Part No.	Weight
ARO-10-140-XX	67g
ARO-10-160-XX	78.5g
ARO-10-180-XX	101g

XX=Color Option **BK** **RD** **GD** **BU**

ARO-18

- Alloy Carrier: Aerospace 7075-T6 Heat treated
- Braking Band: High Grade stainless steel SUS410
- High Efficacy at dissipating Heat and Dirt
- With 6 pcs of steel Bolts
- Beyond ISO Standard

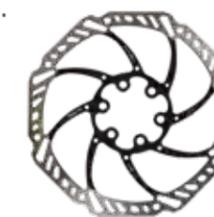

Options / ARO-18

Part No.	Weight
ARO-18-140-XX	77g
ARO-18-160-XX	97g
ARO-18-180-XX	126g
ARO-18-203-XX	158g

XX=Color Option **BK** **RD**

AEGIS

ASHIMA new Single-Piece Construction Rotors are manufactured to High Performance in both Heat and Dirt dissipation. Available on a range of color finish.

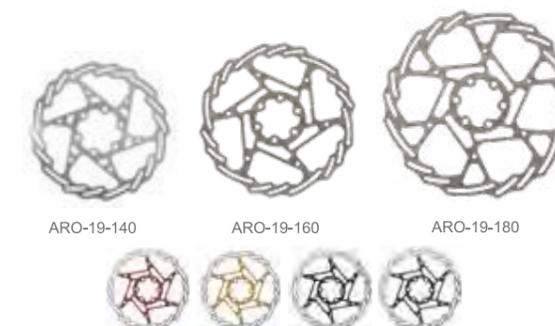

ARO-15

- High Grade stainless steel SUS410
- Single-Piece Construction with Lightweight design
- High Efficacy at dissipating Heat and Dirt
- Beyond ISO Standard

Options / ARO-15

Part No.	Weight
ARO-15-160-XX	91g
ARO-15-180-XX	116g
ARO-15-200-XX	147g
ARO-15-203-XX	149g

XX=Color Option **Plain** **BK** **RD** **GD** **BU** **WH**

ARO-19

- High Grade stainless steel SUS410
- Single-Piece Construction
- High Efficacy at dissipating Heat and Dirt
- Beyond ISO Standard

Options / ARO-19

Part No.	Weight
ARO-19-140-XX	79g
ARO-19-160-XX	106g
ARO-19-180-XX	135g
ARO-19-203-XX	171g

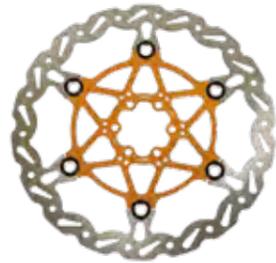

XX=Color Option **Plain** **BK** **RD** **GD** **BU** **WH**

Ashima Two-Piece Construction Floating Rotors provide better brake force, rapid heat dissipation and brake pads wear evenly.

The special design rivets offer space between outer ring and inner ring of the rotor for reducing the deformation caused by heat conduction.

Two-Piece floating rotor delivers consistent braking performance for better control and confidence in race conditions.

- Alloy Carrier: Aerospace 7075-T6 Heat treated
- Braking Band: High Grade stainless steel SUS410
- High Performance Floating Rotor
- High Efficacy at dissipating Heat and Dirt
- Beyond ISO Standard

CENTER-LOCK ROTOR

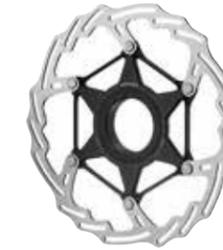

Not only 6-bolt rotor option but also Ashima new centerlock two-piece construction rotors. Centerlock rotors are generally easier and more error proof to install.

- Alloy Carrier: 7075-T6 Heat treated
- Braking Band: High Grade stainless steel SUS410, Ground and Hardened to 42 HRC
- High efficacy at dissipating heat and dirt

ARO-18C

ARO-18C-140-BK

ARO-18C-160-BK

ARO-18C-180-BK

Ashima also provides economical centerlock rotors.

- Two-Piece Construction with center lock rotor
- Braking Band: High Grade stainless steel SUS410 for outer rotor and iron for inner rotor.
- Ground and Hardened to 42 HRC
- Steel Carrier
- Good efficacy at dissipating heat and dirt

ARO-18CT

ARO-18CT-140-BK

ARO-18CT-160-BK

ARO-18CT-180-BK

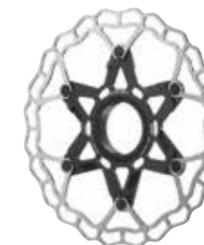

ARO-18CT-203-BK

Advanced centerlock rotors & Floating center lock rotor

- Alloy Carrier: 6061-T6 Heat treated
- Beyond ISO Standard
- Averagely dispersed the shear force.
- Easy assembling and not easy to swinging.

E-BIKE ROTOR

International standard 6 bolt rotor which suitable for E-bike
 Wide range of friction area to increasing brake performance.
 Ultimate strength, brilliant toughness, superior heat dissipation.
 Thickness of 2.0mm

ARO-27

ARO-27-180

ARO-27-203

ARO-27-220

CENTER-LOCK E-BIKE ROTOR

Two-Piece construction with center lock rotor.
 Braking Band: High Grade stainless steel SUS410 for outer rotor and iron for inner rotor.
 Moreover, rotor performance high efficacy at dissipating heat and dirt.
 Thickness of 2.0mm

MULTI-COMPOUND DISC BRAKE PADS

SOS
Multi-Compound Pads

25 PR/BOX Workshop Box Package is available for every model.

- Exceptional high temperature performance
 - Exceptional low temperature/short term braking performance
 - Exceptional wet performance
 - Reduced heat generation due to smaller sintered area
 - Reduced heat transfer due to organic material over piston contact area
 - Exceptional pad wear (pad wears at the rate of the sintered compound)
 - Very Good noise characteristics
 - Good Disc wear due to reduced sintered area
- In short, SOS is the professional choice for all rides

COMPOUND SELECTION

ASHIMA offers a wide range of specific compounds, which offer outstanding performance on all types of rims.

CARBON RIM COMPATIBLE

Pro-Carbon Compound: **CA1**

The newly developed compound is the best solution for Carbon rims. Excellent performance under both wet and dry conditions. Outstanding rim protection by its low operation temperature. And also, reinforced pad wear is the main improvement of CA1 compound.

Pro-Cac: **PCac**

Specifically for carbon rims that are prone to thermal distortion on long descents. As the name suggests Pro. is for professional riders that require ultimate stopping power whatever the conditions. Unlike traditional pads when things get hot Pro just bites harder. Wet performance is up a staggering compared to standard compounds.

Advanced Carbon Compound: **CA**

Developing rim specific compounds for selected OEMs ASHIMA has gained the necessary knowledge to allow year on year improvements, the result is a CRM (CorkRubber Matrix) that excels in wet/dry condition whilst being rim friendly.

AR45R-P-CA1

ARS45RB-P-PCAC

ARS72R-P-CA

ALLOY RIM COMPATIBLE

Pro G: **PG**

For alloy rims as the name suggests Pro. is for professional riders that require ultimate stopping power whatever the conditions. Unlike traditional pads when things get hot Pro just bites harder. Wet performance is up a staggering compared to standard compounds.

Advanced Alloy Compound: **AL**

This is an outstanding compound that gives excellent performance on all alloy rims, giving market leading performance on both dry/wet conditions. This is universally considered as the ideal all round performance and selected by all after-market brands which ASHIMA supply.

Comp-Trial Compound: **CT**

ASHIMA has developed a range of super sticky compounds specifically for trails use where you need huge amounts of stopping power instantaneously, for this compound pad wear/noise take fourth place for the characteristics profile following performance, performance, and performance.

AP68R-P-PG

ARS66-P-AL

AP68R-P-AL

AB48V-P-CT

AP50CV-P-MH-CT

CERAMIC RIM COMPATIBLE

Pro-Ceramic: **CE**

Simply the best compound for ceramic rims, if you ride ceramic rims then the only compound you'll want to use is the ASHIMA Pro-Ceramic.

ARS45R-P-CE

E-BIKE COMPATIBLE

Pro E-Bike Compound: **EA**

Instead of making the brake pad larger, ASHIMA developed this E-bike compound by its up-to-date technology. Specially developed EA compound is suitable for E-bike, Heavy Bike, and Cargo bikes with extra stopping power, and longer pad wear.

4 FUNCTION IN 1 BRAKE PADS

SHIMANO		CAMPAGNOLO	
STANDARD MOUNT	DIRECT MOUNT	STANDARD MOUNT	DIRECT MOUNT

4 in 1 Brake pad Pad Length 54 mm

AR 45R-P-AL

AR 46R-P-CA1

The pad is compatible with 4 different shoes as shown above. The surface design provides excellent braking performance, and is suitable for all weather use.

SHIMANO DIRECT MOUNT

This pad is specially for Shimano direct mount BR-(9110 / 9010 / 7010 / 6810 / 5810 / 5710) caliper. The characteristic of this cartridge is the position of the fixing bolt not as usual, so this special pad is needed in order to fix bolt to avoid the pad comes off.

BRAKE SHOES

ADVANCED RANGE 65 For serious off road performance(Pat.)

Ashima mid-range EBS pad. Braking surface has been broken down into three key areas each with a specific function:

- **Crud Clean:** Cutting features to remove the heavy contaminants
- **Max Brake & Water Remove:** Like a car tire tread water is removed from the contact surface to improve performance
- **Rim Release:** Anti squeal design eliminates noise and the need to set "toe-in"
- This pad is aimed at the more serious weekend rider who likes to get a little dirty, where performance, especially in the mud & crud is a prerequisite.

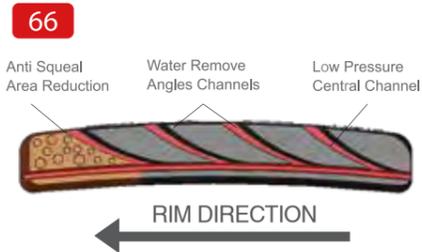

MTB Pad Length 72 mm OP. : AL PG EA

MTB Pad Length 72 mm OP. : AL PG EA

ADVANCED RANGE 66 For outstanding performance (Pat.)

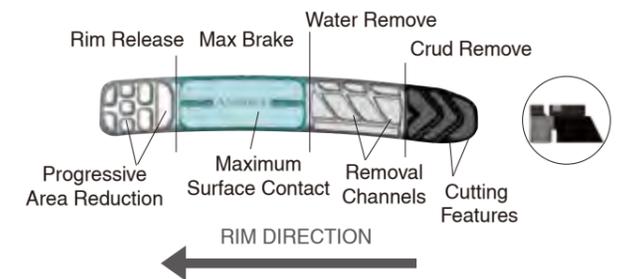

Ashima entry level EBS pad, with advanced groove profile: inspired by a car tire tread the central channel that runs the entire length of the brake surface, ensures contaminants have a low pressure escape route away from the brake/rim interface, giving superior wet performance. Exit channels are angled in the direction of rim travel making it easier to remove the contaminants from the brake. This range is targeted at more frequent bike riders and ideal for the commuter where performance is more of a concern.

ROAD (Shimano - Direct Mount) Pad Length 50 mm OP. : AL PG CE

ADVANCED RANGE-4FUN 68 For Ultimate off road performance(Pat.)

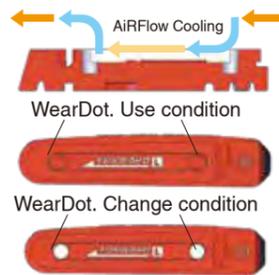

This pad represents the pinnacle of EBS technology; where not only has the braking surface been engineered but also the side profile has been specifically styled/shaped to significantly improve braking performance in the most aggressive of environments.

MTB Pad Length 72 mm OP. : AL PG

PRO RANGE 72 73 75 76

Features

- Elongated pad for superior braking
- Crud Clean: Cutting features & plough to remove the most stubborn of contaminants
- Water Clean: Prime rim surface ready for braking using improved groove technology
- Max Brake: Largest contact area centered on bolt axis for uniform surface pressure
- Rim Release: Anti-squeal design eliminates noise and the need to set "toe-in"

72 ROAD (Shimano-Standard Mount) Pad Length 65 mm OP.: CA PCac CA1 AL PG CE

ROAD (Campy) Pad Length 65 mm

MTB Pad Length 80 mm OP.: AL PG CE

RPMx: RUBBER PLASTIC MATRIX PADS Pat.

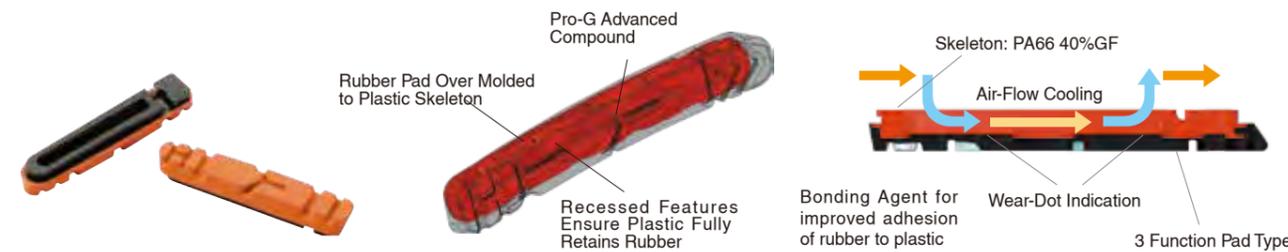

Features

- Plastic/Rubber Matrix
- High strength engineering grade PA 66 40% GF used for pad/holder interface

Advantages

- Superior fit between pad and holder. Rubber molding tolerance +/-0.3mm, Plastic molding tolerance +/- 0.05mm
- Vastly improved production stability. Rubber mold tool 60-80 cavities vs plastic 1 LH & 1 RH
- Ultra-stiff pad. Reduces compression of rubber giving more responsive better performing brakes Improved rider safety.
- Impossible to accidentally remove pad from holder whilst removing / fitting wheels, unlike standard rubber pads
- Reduced weight
- Air-Flow cooling
- Wear-Dot Indication

MTB Pad Length 73 mm OP.: AL PG CE

75 Pad Length 54 mm

ALLOY SPECIFIC PADS: 75 Series Pads

Pro-G compound is made by multi natural materials, and having high coefficient of friction. This compound has the characteristic of water repellent, which can enhance the braking performance, especially in wet condition. Pro-G compound also shows the excellent heat resistance and extremely stable friction performance.

CARBON SPECIFIC PADS: 75 Series Pads

"what works on alloy isn't always best for carbon"

After many years of developing compounds for a multitude of rim manufacturers we know pad requirements for Carbon are very different from those on Alloy rims; that's why their profiles must be different.

For carbon there are three primary driving forces; rim protection heat/wear, wet performance and pad wear. The pads must deliver maximum braking in all conditions whilst operating at the lowest temperature, and you don't want to be changing pads halfway through a race or rims every few stages! It's simple, the lower the operating temperature the lower the wear, hence our 75 series pads offer maximum contact but with sufficient channeling to ensure high wet braking performance. Generally wet performance on carbon is an issue, a dangerous issue. 90% of carbon pads sold may will protect your rims but they can't stop you when it matters in the wet. With alloy rims wet performance can be enhanced by pad profile but not so on carbon where it's solely down to compound. That's why Ashima developed Pro-Cac, which is used on all 75 series brake pads, to deliver wet performances on par with Alloy.

46 76 for Wide Rims 23-28mm Pad Length 54 mm OP. : CA PCac CA1 AL PG CE

CARBON SPECIFIC PADS FOR WIDER RIMS:

"76 Series pads are not only thinner for wider rims, but also compatible with both Shimano and Campagnolo"

The wider carbon rims are getting more popular nowadays. In order to maintain the braking feeling for riders who are using wider rims, Ashima now has the thinner pads for the rim width over 23mm. Another main feature of these pads is that they are compatible with Shimano system, as well as Campagnolo system. Ashima improves product quality by increasing the riding performance, also enhancing the convenience of use.

reaction+ PRO PTFE COATING WIRES

Ashima Reaction+ Pro PTFE Coating Wires provide initial pre-stretching to avoid re-adjusting the inner length after using. This wire serves up corrosion resistance and weather resistance, especially smooth low friction and crisp stopping power under all conditions.

INNER WIRE

- Stainless Steel Slick, 19 x Strands
- Increased environmental protection
- Slick Reduced weight
- Pre stretched to ensure 1 set-up
- Surface smoothed for improved efficiency
- Pro PTFE coated Initial Pre-stretched, Ultra slick.
- Ultra low friction surface for improved efficiency
- Hard wearing for endurance/life
- Increased environmental protection
- Excellent corrosion resistance, acid, alkali resistance and weather resistance.
- Universal Campagnolo/Shimano/ Universal end fittings

reaction+ X10-9 PTFE Inner Wire

ReAction+ is Ashima's premier derailleur offering delivering smooth, precise, effortless shifting. What is Nano Coating? Nano coating is a process where PTFE is added to plasma, which is then sprayed on the surface of the wire bundle. The result is a super fine coating (1000x finer than the thickness of a human hair) that penetrates deep into the wire strands rendering the surface super slick, with lowest friction possible and incidentally, also water repellent. In short it delivers cables with the best efficiency possible.

FERRULE TECHNOLOGY:

Plastic Ferrules

FerPlus+ ferrules incorporate many of the benefits and advantages offered by the FerFlex and FerStd Aluminum range but for the more economically sensitive user.

- Helix Molded outer profile allows sufficient flex to facilitate tighter cable routings
- Double Integral Seal design improves environmental protection
- Integral grips bite onto the outer for better retention
- Brass insert prevents damage to ferrule from the outer wire/strands
- Inner wire seal ensures environmental protection and cable efficiency throughout life
- Free-Angle Nose improves cable routing/efficiency, articulation and environmental protection

GEAR-DOCTOR:

Features:

- Aluminum Cable Adjuster
 - Extended inner thread provides extra stiffness to joint
 - Rubber Sleeve to protect frame
 - Ribbed for improved grip
- Fine Pitch aluminum adjuster threads
 - Spring loaded to prevent self-adjustment
 - Improved thread strength
 - Improved sensitivity for precise control
- Fully sealed nosed ferrules
 - Inner wire sealed
 - Outer casing sealed
 - Lined, preventing inner-wire rubbing aluminum components, improving cable efficiency
 - Brass inserts prevent damage from outer casing stand wires

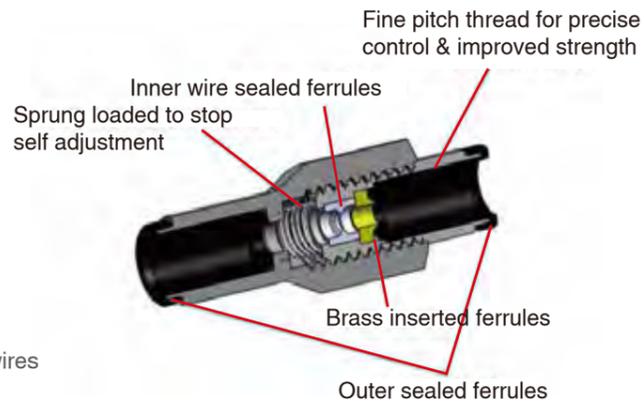

MINI GEAR-DOCTOR

Features:

- Aluminum Cable Adjuster
 - Extended inner thread provides extra stiffness to joint
 - Ribbed for improved grip
- Fine Pitch aluminum adjuster threads
 - Spring loaded to prevent self-adjustment
 - Improved thread strength
 - Improved sensitivity for precise control
- Brass inserts prevent damage from outer casing stand wires

By removing the top and bottom sides of the rubber sleeve, it can be used in the brake cables.

HYDRAULIC FITTINGS PRESS

RT-HFP-U-2

HYDRAULIC HOSE CUTTER

Portable hydraulic hose-cutting tool for quick, secure and precise cut. This hose cutter is specially design for non-leakage in order to using safety. Also be operated with one hand making it easy to cut. Moreover, the replacement blade set allows you to open up the cutter for quick and easy insertion

- Lever design for labour-saving cut.
- Cutter is suitable for hydraulic hose below Ø5.5 mm.
- Replacement blade set is available
- High-Quality Lightweight nylon handles, only 60.5 g.
- Wire latch holds handles together when not in use.

RT-HC-U-2

Remark:
 Ø5.0 x Ø2.1 : Avid, Sram, Magura
 Ø5.0 x Ø2.3 : Shimano, Formula
 Ø5.4 x Ø2.5 : Hayes, Tektro
